

Quality Compliance Management System

Process Automation
& Digitalisation

In most Companies the management of Compliance with rules, policies, guidelines, practices, and standards is largely done through a manual and labor-intensive process

Document versioning, signed hard copies, distribution and archiving can become complex and time consuming.

Things are getting tougher when **unpredictable events** happen, at the production process, and must be tracked and reported following a specific protocol.

Organizations must act very quickly and **adapt their business processes**, introducing **changes** that will fix problems, boost productivity and maintain high quality.

How can you manage this critical & complicated business flow without introducing expensive software or hiring expert resources?

Intelligent Quality Compliance Management System

✓ **Quality Documents Workflow**

✓ **Quality Compliance**

✓ **C.A.P.A. Process**

- Deviation Incidents
- Change Requests Management

Based on the
